50 INTEGRATIONS

THE PROBLEM

The core problem with domain names lies in their limited practicality, often lacking significant utility.

PROBLEMS

- Domains that are not intended for everyday usage
- The registration of unutilized domains has hit its lowest levels since 2022.
- Centralized solutions of social networks

SOLUTION

**Notable feature -
Domain give access as
dedicated Web3 platform
where you could bolster
your crypto-native presence**

SOLUTION

- ZNS Domains opens the door to crafting personalized social profile pages through the ZNS platform. These profiles can showcase links to your various social media accounts, NFT collections, crypto achievements, and more
- Domain empowers you to maintain your reputation seamlessly across your preferred apps all while retaining control over your own data
- It's a crucial component of branding, influencing how your target market perceives you.
